USER INTERFACE DESIGN EXPERIMENT – 8
STORYBOARD FOR MOBILE E-COMMERCE APP USING BALSAMIQ

Name: **Sangamithra Arun**
Roll No: **240701465**
Course: **USER INTERFACE DESIGN**

AIM

The aim of this experiment is to create storyboards representing the user flow for a mobile E-commerce application using Balsamiq Wireframes.

PROCEDURE

1. The tool used for designing wireframes is Balsamiq Wireframes.
2. A new project was created and multiple mobile screens were added to simulate the complete shopping experience.
3. Each screen represents a specific stage in the user journey, from browsing products to completing a purchase.
4. UI components such as buttons, text fields, dropdowns, images, and icons were selected from Balsamiq's built-in library.
5. The wireframes were designed to be simple, clean, and focused on improving user interaction and navigation flow.

USER FLOW

1. Homepage – Users can browse featured products, search for items, and navigate to categories.
2. Categories Screen – Displays different product categories like Electronics, Fashion, and Home.
3. Product List Screen – Shows products in a selected category with image, name, price, and "Add to Cart" option.
4. Product Details Screen – Provides detailed information about a selected product.
5. Checkout Screen – Displays cart items, total cost, and allows users to enter delivery details.
6. Payment Confirmation Screen – Allows users to select payment method and confirms the order.
